Crownsville, MD 21032

KASI infrared (R. Filion Manufacturing Co.) has been an integral part of Asphalt Restorations, Inc.'s (ARI) success for the past 15 years. From the equipment to the service, in my opinion there is no other infrared manufacturer that can deliver such a powerful product with unmatched service.

Every piece of infrared equipment KASI offers is tough, durable and construction ready. From my experience, these machines have been put through the punishing, day to day, demands of the asphalt repair industry and they have stood the test of time.

Just as dependable as the infrared equipment, is Roger Filion and his entire staff. Everyone from inside support to the shop foreman is 100% dedicated to your success. Personally speaking, there has never been a time when we have called for support and not gotten immediate attention. You literally get the feeling everyone has stopped what they are doing to help you. When you are out in the field and time is money, it's great to know KASI is on your side.

If you are looking to enter the asphalt infrared repair world, then I highly recommend Roger and his team at KASI.
